Dose- and time-dependent action of **morphine**, tramadol and **flupirtine** as studied by radioelectroencephalography in the freely behaving rat

W Dimpfel, M Spüler, B Nickel - Neuropsychobiology, 1988 - content.karger.com

The necessity of testing psychoactive drugs in awake freely moving animals has led to the development of a telemetry-based system which enables the pharmacologist to follow centrally active molecules in their time- and dose-dependent effects on electric brain activity in terms of changes in ...
